

AMENDMENTS TO THE DRAWINGS

The attached five (5) replacement sheets of drawings includes remedial changes to Figs. 1, 2, 6, 11 and 14, covering original drawing sheets 1/13, 2/13, 6/13, 9/13 and 11/13, respectively. In each of these drawing figures, the partial views are being appropriately numbered to conform to USPTO drawing requirements (37 CFR §1.84(u).) Additionally, with regard to Fig. 11(h), numeral 13 is being changed to 13' and the missing reference character 5a is also being inserted. Clarity of hashmarks also improved in those drawing sheets.

Attachments: Five (5) replacement sheets directed to Figs. 1(a)-1(b), 2(a)-2(h), 6(a)-6(h), 11(a)-11(k) and 14(a) -14(b) of the drawings; annotated sheets showing the changes being made to original drawing Figures 1, 2, 6, 11 and 14.

REMARKS

Acceptance and formal entry therefor of this amendment as a supplement to the earlier submitted fully responsive amendment, dated November 12, 2004, is respectfully requested. The original Specification was revised to correct minor informalities therein as well as to improve the readability thereof. However, due to the extensiveness of the revisions being implemented, applicants, through their undersigned representative, are submitting a Substitute Specification directed thereto (see **Attachment A**). It is submitted, new matter is not being added, either by addition and/or deletion. Also, since the accompanying Substitute Specification is a voluntary submission by applicants, enclosed herewith, also, is a marked-up version of the original Specification showing changes being made thereto (see **Attachment B**). Acceptance therefor of this Substitute Specification as a replacement of the originally submitted Specification is respectfully requested.

Acceptance of the five (5) replacement sheets of drawings, directed to Figs. 1(a)-1(b), 2(a)-2(h), 6(a)-6(h), 11(a)-11(k) and 14(a)-14(b), is also respectfully requested. The changes being effected in these drawing Figures, which are explained hereinabove under the heading "Amendments to the Drawings," applicants submit, are directed to minor formal matters. That is, the labeling of the respective drawing Figures is being revised to conform with USPTO requirements directed thereto. Also, the reference numeral 13 in Fig. 11(h) was changed to the reference character 13' so as to differentiate the same from reference numberal 13 used in Fig. 11(d), consistent with the corresponding revision implemented in the Specification (see page 38, line 8, of the original Specification). Likewise, the newly included reference character 5a in Fig. 11(h) conforms to the same reference character referred to on page 38, line 9, of the original Specification. Along with the substitute

drawing sheets directed to the presently amended drawing illustrations, corresponding annotated sheets are also enclosed which show the actual changes being made in red.

Formal entry therefor of this submission as a supplement to the earlier filed responsive Amendment as well as a favorable action on the above-identified application is respectfully requested.

Please charge any shortage in fees due in connection with the filing of this paper, including extension of time fees, to the Antonelli, Terry, Stout & Kraus, LLP Deposit Account No. 01-2135 (Docket No. 500.39915X00), and please credit any excess fees to such Deposit Account.

Respectfully submitted,
ANTONELLI, TERRY, STOUT & KRAUS, LLP
